

JLG Forklift Parts

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove embarked on a cross country RV trip. After spending many years establishing his family built crane business with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end result of a road expedition.

All through their trip, John reacquainted himself with former business connections along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial market for a product that could promptly and safely elevate people in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John established a partnership with two friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they manufactured and sold the first JLG aerial work platform. The company incorporates many of the basic design essentials of that original lift into existing designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fateful cross-country journey and since the first JLG aerial platform entered the market. As of today, the business has extended itself into a number of international marketplaces and continues to cultivate contemporary equipment to ensure that clients are able to become safer and more well-organized within their workplace.
